

## MoM - Minutes of Meeting

**Date:** 19.11.2020

**No.:** 8

**Location:** Zoom

### Attendees:

Andor Davoti

Aurora Kiese

Sindre Fladvad (meeting leader)

Thomas Stoltenberg (secretary)

### Meeting Notes

- Everyone shared what they have been working on since last meeting:
  - Sindre worked translating the mockups to English
  - Andor worked the app page, and improving the website based on the user testing feedback
  - Aurora worked on rewriting the text content to the app page, in relation to the feedback from the user testing
  - Thomas worked on improving the challenge and solution page based on the feedback, adding more images to make the website more interesting and reducing parts of the text by using illustrations in the text.
  
- We conducted a user testing to gain feedback on the website
  - Some users reported that the website pages solution and challenge had too much text and was not entertaining enough. Suggested changes such as adding more images and color, further removing/rewriting parts of the text so the website is easier to read and interact with.
  
- Before next meeting:
  - Test all parts of the website on different devices and check responsiveness.

- Check for all relevant WCAG guidelines: Accessibility, No-Script user experience, TAB navigation, alt-attributes.
- Ask TAs for their input on the current design of the website
